To learn more about the
 value of AIA Palomar visit:
www.aiapalomar.org

Join AIA Palomar & CSI San Diego for a tour and informative presentation of this net-zero energy, carbon neutral, SDG&E Case Study Home, while it is under construction.

The Green Home is being built using 1 ft thick recycled styro-foam & concrete ICF block and will be heated and cooled with a ground source geothermal heat pump.

The Design and Build Teams will be on hand to discuss the many green features of this planned LEED Platinum home. For more info, visit www.FarrarGreenHome.org
